Education

Azerbaijan State Oil and İndustry University
Bachelor of Process Automation Engineer
Graduated: 2024

Azerbaijan Technical University
Master of Informatics and Management in technical systems

Skills

- HTML
- CSS
- Javascript
- Typescript
- React
- React Query
- Next.js
- Node.js
- Express.js
- ChakraUI
- Bootstrap
- Tailwind
- SASS (SCSS)
- Redux
- Redux Toolkit Query
- MongoDB
- Recoil
- Postman
- Github
- Git
- Socket.io
- Figma
- Postman
- Notion
- MaterialUI

Certificates & Achievements

Algorithmics
Front-end developer certificate

Evo Coding Center
Front-end developer certificate

Caspian Innovation Center (Socar)
Front-end developer certificate

Language

Azerbaijan   **English (B1-B2)**   **Turkish**

Experience

Coffee Me
Front-end Developer
07.2024 - Present

In the CoffeeMe , I developed an admin panel and partner app, focusing on managing the interaction between coffee shop owners and customers. I utilized React with Redux Toolkit Query to efficiently handle API calls. My responsibilities included:

- Frontend architecture: Implemented dynamic UI components for managing products, orders, and user interactions.
- Authentication: Built secure login flows with token-based authentication, handling refresh tokens and session persistence.
- Real-time updates: Enabled real-time order and product updates, ensuring that coffee shop owners and customers always have up-to-date information.

Evo Academy
Front-end Mentor
07.2024 - Present

As a Front-end Developer mentor at EvoAcademy, I lead my students in the development of a real-world e-commerce website, guiding them through every stage of the project. I focus on teaching practical web development skills, covering essential technologies like React, Redux, and Node.js. Through hands-on experience, my students learn how to create dynamic, responsive, and user-friendly interfaces, manage state effectively, and integrate with backend systems. This project-based approach helps them build the skills needed to succeed in real-world scenarios.

Caspian Innovation Center
Front-end Developer
01.2024 - 06.2024

During my time at Caspian Innovation Center, I developed multiple projects, including a full-featured CRUD and request management system. I focused on building responsive front-end applications using React and managing state with Redux Toolkit. I also implemented complex request handling systems, integrating with REST APIs for seamless data management.
